EXPERIENCE

ION Game Design, *Stockholm*

October 2025 - May 2026

Game Programming Intern

- Implemented free-to-play versions of released mobile games in Unity by integrating AdMob monetization (banner, interstitial and rewarded ads)
- Contributed to migration of multiplayer backend services from AWS to Firebase.
- Developed gameplay features in Unreal Engine for an in-development title, contributing to a released demo build.

EDUCATION

The Game Assembly, *Stockholm*

August 2023 - May 2026

Game Programming - (Higher vocational education)

- Eight cross-discipline group projects in Unity, TGA's in-house engine, and a group made engine. Collaborated with artists, level designers and procedural artists.
- Individual courses including C++, graphics programming using DirectX11, linear algebra, AI, data structures and networking.
- **Graduation project:** Recreated uncharted 4 procedural hand animations in my custom engine.

LBS (Ljud & bildskolan), *Borås*

August 2020 - June 2023

Game Programming - Technology Program (Upper secondary school)

- Three cross-discipline group projects in Unity. Collaborated with artists.
- Individual courses including C#, game development using Unity, graphics design, XR development and networking.
- **Graduation project:** Recreated Minecraft-style procedural terrain generation in unity to deepen understanding of procedural generation techniques.
- **Graduated as game developer of the year.**

SKILLS

- **Languages:** C++, C#, HLSL, GLSL, Python
- **Tech Stack:** Unity, AdMob, CMake, Premake, Git, Perforce, FMOD, RapidJson, ImGui
- **Graphics:** DirectX11, OpenGL
- **Human Languages:** Swedish (native), English (fluent)
- **Soft Skills:** Cross-discipline collaboration, agile development, problem-solving, quick adaptation
